# TASK 3: Modify Instance Type
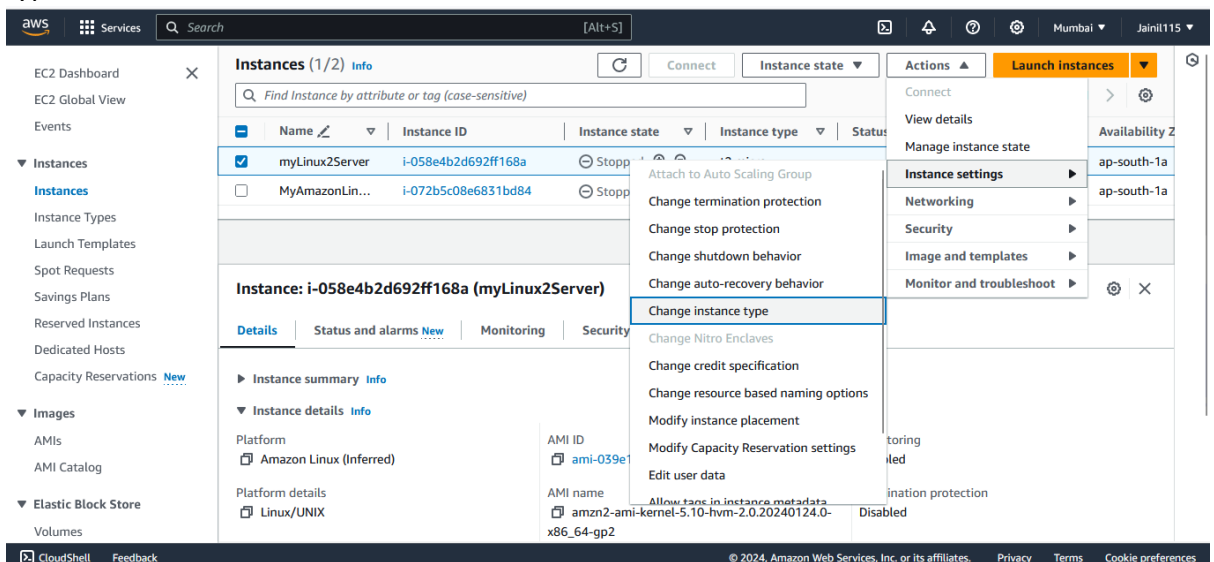

1. **Make it from t2.micro to t2.small or t2.nano.**

**Steps to modify EC2 instance from t2.mirco to t2.small:**

1. Stop the EC2 instance. To stop EC2 instance "myLinux2Server" select "myLinux2Server" then click on instance state and click on stop instance.

2. Now click on "Actions", then click on "Instance settings" and select "Change instance type".

3. Now inside "new instance type" search for t2.small. Then click on apply.

4. After clicking apply you will be able to see the change in instance type.
